BSD City ,Tangerang Selatan, Indonesia

Software Developer specializing in full-stack JavaScript development, with experience building Full stack apps with user-friendly interfaces using React and Next.js.

Work Experiences

CODE.ID - Jakarta, Indonesia

Mar 2026 - Present

Frontend Developer

IT Consulting company based in Jakarta

- Developed and maintained the HVC (High Value Customer) Mini App within the MyTelkomsel ecosystem, implementing responsive user interfaces from Figma designs using React, TaroJS, Tailwind CSS, TypeScript, and Zustand.
- Integrated backend APIs and implemented business requirements to support features and data presentation within the mini app.
- Worked closely with QA engineers during testing and bug-fixing phases to ensure feature quality and resolve issues before release.

SMPxIT - Remote

Nov 2025 - Jan 2026

Frontend Developer (Freelance)

A digital product development company delivering software solutions for startups and enterprise clients.

- Developed and maintained the company's main business website
- Built a job portal and blog platform and their respective CMS with Next.js
- Implemented responsive and reusable UI components using Tailwind shadcn/ui

Platon - Jakarta, Indonesia

Nov 2023 - Nov 2024

Full Stack Developer

Software development agency that builds digital products, including web/mobile applications, system integrations, and business tools.

- Developed web applications for multiple clients using Next.js, React, PostgreSQL, Prisma, and React Query
- Collaborated with designers to deliver production-ready features
- Contributed across the full development lifecycle, in a solo and team environment from planning and development to deployment

Telkom University Faculty of Industry Engineering - Bandung, Indonesia

Jun 2020 - Aug 2020

Front End Developer Intern

- Developed Front-End for the project Thesis Selection App
- Designed Use-cases and other UML diagrams for project's analysis

Commsult Indonesia - Tangerang Selatan, Indonesia

Jan 2022 - Nov 2023

Full Stack Developer

German-rooted software house specializing in custom software solutions, mobile/web applications, and ERP systems.

- Developed Akomate, an all-in-one hotel management system with 21+ features including Accounting, Booking, and Auditing, built using the MERN stack (MongoDB, Express, React, Node.js) with Redux for state management and Material UI for the interface.
- Developed Ontego Traces (traces.ontego.de), a fully integrated software solution for planning, tracking, and optimizing beverage delivery routes with automated delivery time notifications for end customers, using React for the frontend.
- Rewrote backend API endpoints for Ontego Traces from Spring Boot to an entirely new Typescript+Node+Express app

Education Level

Telkom University - Bandung, Indonesia

Aug 2017 - Nov 2021

Bachelor of Information Systems, 3.41/4.00
